The Arizona Department of Health Services was established as the State Public Health Agency in 1973 under A.R.S. Title 36 and is designated as Arizona's Title V Agency. The Bureau of Community and Family Health Services, in which the Office of Women's and Children's Health and the Office for Children with Special Health Care Needs are located, provides policies and standards development, comprehensive planning, community organization and development, training and technical assistance, and direct provision of screening, preventive and curative services. Services provided through the Title V program include, but are not limited to, the statewide Newborn Screening, Universal Newborn Hearing Screening, High Risk Perinatal Services, Children's Rehabilitative Services, community development, Community Grants Initiative, Family Planning, Hotline, Health Start, Medical Home Project, and Traumatic Brain Injury Project.

MATERNAL & CHILD HEALTH (MCH) MEASURES

Title V - MCH National Performance Measures  2004 Results The percent of newborns who are screened and confirmed with condition(s) mandated by their Statesponsored newborn screening programs (e.g., phenylketonuria and hemoglobinopathies) who receive appropriate follow up as defined by their State.  The percent of children with special health care needs age 0 to 18 who receive coordinated, ongoing, comprehensive care within a medical home. (CSHCN Survey)  Percent of children with special health care needs age 0 to 18 whose families report the community-based service systems are organized so they can use them easily. (CSHCN Survey)  Percent of 19 to 35 month olds who have received full schedule of age appropriate immunizations against Measles, Murps, Rubella, Pollo, Diphtheria, Tetanus, Pertussis, Haemophilus Influenza, and Hepatitis B.  The rate of birth (per 1,000) for teenagers aged 15 through 17 years.  The rate of deaths to children aged 14 years and younger caused by motor vehicle crashes per 100,000 dildren aged 14 years and younger caused by motor vehicle crashes per 100,000 and the process of newborns who have been screened for learning before hospital discharge.  Percentage of mothers who breastfeed their infants at hospital discharge.  Percentage of newborns who have been screened for learning before hospital discharge.  Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester.  Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester.  Title V - MCH National Outcome Measures  Title V - MCH National Outcome Measures  The ratio of the black infant mortality rate to the white infant mortality rate per 1,000 live births.  The ratio of the black infant mortality rate to the white infant mortality rate per 1,000 live births.  The perinatal mortality rate per 1,000 live births plus fetal deaths. # FAMILY PARTICIPATION IN CSHCN PROGRAM

Family members participate on advisory committee or task forces and are offering training, mentoring, and reimbursement, when appropriate.

Financial support (financial grants, technical assistance, travel, and child care) is offered for parent activities or parent groups.

Family members are involved in the 3 Children with Special Health Care Needs elements of the MCH Block Grant Application process.

Family members are involved in service training of CSHCN staff and providers.

Family members hired as paid staff or consultants to the State CSHCN program (a family member is hired for his or her expertise as a family member).

Family members of diverse cultures 1 are involved in all of the above activities.
